Statement of reasons for allowance

Claims 1-14 have been allowed.

The claimed structure whereby said first to fourth sidewalls on the side surfaces of said first and second gate electrodes of first and second transistors formed on wells of different conductivity types in a substrate and the specific thickness relations of the sidewalls is neither taught or rendered obvious by the prior arts.

Examiner's Amendment

The non-elected claims 15-22 have been canceled. Please note that the method claim 14 and its dependents can not be part of the allowed claims because they do not claim the relationships between the first and the second sidewalls and the third and fourth sidewalls the way they were specifically addressed in claim 1. Although the overall composite sidewall relationship was presented, the specific individual sidewall structures that were instrumental for the allowance of claims 1-14 were omitted rendering the structure in claim 1 and the method of making a structure in claim 15 qualitatively different.
